

Program Overview

PC&VS will serve adults who wish to be fully employed, adults that wish to be partially employed, and adults who chose not to work, but to remain active in their communities to any degree that they choose. Our day program will focus on empowerment, self-advocacy, and community integration. We will strive to increase opportunities and develop positive self-concepts for the individuals we will serve. We anticipate working with consumers from varying ethnic backgrounds and with varying disabilities (i.e., exceptionalities) and will embrace these differences. Our philosophy will focus on supporting the needs of the individuals we serve; building self-concept through activity and productivity and increasing opportunities and access to the community.

We offer:

- Psychological Support - We will incorporate several aspects of counseling opportunities. These opportunities will focus on the appropriate way to interact with others (i.e., fellow day program attendees, staff and visitors who come into the program, and others in the community)
- Activities of Daily Living Support - We will expect that clients will come to us with varying levels of skill with activities of daily living. Our program will teach/assist clients with cleaning, grocery shopping, budgeting skills and other ADL skills.
- Behavioral Support - Our staff will utilize positive behavior support plans for our clients. The plans will be based on Functional Assessments of inappropriate behavior. The assessment will focus on determining the triggers, consequences, and functions of the inappropriate behavior and support the development of positive alternative behaviors.

Welcome to PC & VS

Progressive Community and Vocational Services, LLC is a place where an individual with developmental disabilities can find a welcoming atmosphere where respect and dignity dominates the way we treat those in our care. Settled in a peaceful location at Orange, California, our facility offers services and programs that cater to individuals and families battling with the challenges of developmental disabilities.

We believe that life is shaped with opportunities - not with limitations. Our mission is to maintain the dignity of individuals with developmental disabilities while enhancing their potential. Like every other citizen of the world, they are entitled to respect and appreciation for their being. With us, your loved one will find a safe place and a loving environment that acknowledges the responsibility to provide assistance for daily living as well as the proper implementation of a treatment plan for individuals with developmental disabilities.

Our staff members are trained to provide care and attention by providing assistance with activities for daily living and a care treatment plan that enhances their independence skills. We provide a sense of hope for a safe place that individuals with developmental disabilities can take refuge in. Their family members take comfort in the knowledge that professionals are taking care of their loved one's needs. Day after day, we celebrate every improvement. We go the distance to help and make a difference.

About Us

Progressive Community and Vocational Services, LLC (PC&VS) is a dynamic partnership between two individuals (Hector Navarro and John Lubbers Ph.D.) with a collective 25 plus years of rewarding experience working with individuals with developmental disabilities.

Hector Navarro has over 12 years of experience working with individuals with challenging behaviors and has provided services for individuals from Metropolitan State Hospital and Fairview Developmental Center, as well as individuals with forensic involvement. In his experience, over the time that he has worked with clients with developmental disabilities, he has continued to remain highly supportive of all of his client's endeavors.

John Lubbers Ph.D. has over 13 years of personal experience working with individuals with developmental disabilities exhibiting severe behavior challenges. His experience includes consulting with residential care facilities, day programs, providing caregiver training. He has had the profound experience of working in a psychiatric facility for chronic, acute, mentally ill individuals, thus he is familiar with individuals with mental health support needs. Last, Dr. Lubbers has developed programs for intensive, comprehensive interventions for individuals with developmental disabilities assisting them with language development, social skills development, self-help skills, and positive replacement behaviors for many years.
